

SEASONING POWDER FOR DOG

MYF-QT-01

Pet Feed Compound Seasoning

Made from natural materials crafted by advanced biotechnology, this dog food flavor enhancer is presented as tawny powder in good fluidity. Compound amino acid is added to boost immune system. This dog food seasoning helps increase appetite and enhance the palatability.

Ingredients:

Chicken Liver, Protease, Brewer's Yeast, Compound amino acid, Salt, Silica, etc.

Physicochemical indexes

Moisture \leq 8%

Crude protein \geq 45%

Crude fat \leq 20%

Ash \leq 10%

Heavy metal content

Cr \leq 5 mg/kg

Pb \leq 10 mg/kg

Total bacterial count \leq 10000 cfu/g

Coliform negative

Salmonella negative

Instructions: Fineness 98% over 60 mesh

Granular grain: Spread over on the surface with an additive amount of **1%-2%**. The specific usage amount depend on product positioning and cost.

Snacks: Add as additive amount of **2%-4%** with the main ingredients or spread over the surface. The specific usage amount depend on the different snack types.

Health care products: Apply **5%-10%** of the seasoning in tablets, powders, etc. The specific usage amount depend on product positioning and cost.

Storage:

Product seal stored in a cool dry place, valid for 12 months. Unsealed should be completely used within 30 days.

Precautions:

Stored away from moisture and mildew. Do not feed ruminants.

SEASONING CREAM FOR DOG

MYG-QT-01

Pet Feed Compound Seasoning

Made from natural materials crafted by advanced biotechnology. This seasoning cream presented as brown liquid, the viscosity gradually decreases with temperature increase. Compound amino acid is added to boost immune system. This dog food seasoning cream helps increase appetite and enhance the palatability.

Ingredients:

Chicken Liver, Compound amino acid, Brewer's Yeast, Protease, phosphoric acid, Flavouring essence, etc.

Physicochemical indexes

Moisture \leq 70%

Crude protein \geq 10%

Ash \leq 10%

PH value : 2-4

Heavy metal content

Cr \leq 5 mg/kg

Pb \leq 10 mg/kg

Total bacterial count \leq 10000 cfu/g

Coliform negative

Salmonella negative

Instructions: Fineness 98% over 60 mesh

Granular grains: Spread over on the surface with and additive amount of 4%-6%, or the same proportion mixed with grease, heated into 35°C-45°C if necessary. The specific usage amount depend on product positioning and cost.

Snacks: Add as additive amount with the main ingredients or spread over the surface. The specific usage amount depend on the different snack types.

Storage:

Product seal stored in a cool dry place, valid for 6 months. Unsealed should be completely used within 7 days.

Precautions:

Stored away from moisture and mildew. Do not feed ruminants.
